Cincinnati, OH | srivasta@mail.uc.edu | +1 (513) 838-8029 | [linkedin.com/in/srivasta26](https://www.linkedin.com/in/srivasta26)

PROFESSIONAL SUMMARY

Finishing an M.S. in Applied Economics (Entertainment Economics concentration) at the University of Cincinnati after five years running an international film consultancy alongside academic research on media markets and regulatory policy. Equally comfortable in a spreadsheet or a greenlight meeting: has priced tax-incentive stacks on \$40M+ productions, modeled box office returns against macroeconomic data and written regulatory analysis on blockchain and sports betting in the EU. Looking for an analyst or strategy role in media, streaming, or entertainment finance where that mix of production experience and quantitative rigor is useful.

EDUCATION

Master of Science in Applied Economics — Entertainment Economics Concentration

Expected August 2026

University of Cincinnati, Carl H. Lindner College of Business

Cincinnati, OH

Graduate Certificate in Artificial Intelligence in Business | GPA: 3.8

Relevant Coursework: Time Series Econometrics, Panel Data Econometrics, Competition and Regulation, Smart Contract Design, Blockchain Finance, Data Mining for Business Intelligence, AI in Organizations, Big Data Integration

Bachelor of Arts in History & Bachelor of Interdisciplinary Studies in Digital Media

May 2025

University of Cincinnati, College of Arts & Sciences

Cincinnati, OH

Concentrations: Economic History; Film & TV Production | GPA: 3.7

Undergraduate Thesis: Japanese Film Economy Under Allied Occupation (1945–1952)

PROFESSIONAL EXPERIENCE

Independent Media & Production Finance Consultant

June 2020 – Present

Independent consultancy, run alongside the roles below since 2020.

Global (Remote)

- Directed development, budgeting, and market strategy for 20+ international film and TV projects across 14 countries, partnering with Arte, ZDF, PBS, and WABC.
- Negotiated tax-incentive and private-funding packages worth roughly **\$10M** across EMEA and North America — often covering close to 40% of a project's budget.
- Built the financial models and market forecasts behind more than **\$40M** in film and TV projects, including territory-by-territory revenue projections and incentive optimization.
- Advised productions that have gone on to win regional Emmys and qualify for the Academy Awards and BAFTA.

Graduate Research Associate

August 2025 – May 2026

University of Cincinnati, Department of Economics

Cincinnati, OH

- Researched how EU regulatory frameworks are reshaping digital platforms and media markets, using econometric and statistical modeling.
- Translated quantitative findings on media policy into analysis usable by non-economist stakeholders, in collaboration with faculty.

Senior Research Associate & Analytics Team Lead

May 2023 – July 2025

UC School of Public and International Affairs

Cincinnati, OH

- Analyzed **\$500M+** in ownership and financial records (Bloomberg Terminal, Excel) to trace cross-border investment patterns and market trends.
- Directed a data analytics team investigating multinational tax structures and questionable ownership arrangements tied to offshore havens.

Research & Policy Consultant

May 2020 – July 2021

Center for Regional Research & Sustainability Studies

Brussels, Belgium

- Tracked media market and regulatory developments across Europe and the U.S. for institutional clients in the media and telecom sectors.
- Authored research reports and strategic briefs that informed policy-focused decision-making.

- Studied U.S. film and TV titles to identify distribution patterns and audience behavior for Katch's content-intelligence database.
- Delivered distribution insights and content classification analysis for media-client research engagements.

RESEARCH PROJECTS

Blockchain, Media Rights, and Sports Betting: Economic and Regulatory Implications in the EU

- Investigated the financial and legal effects of blockchain technology on media rights markets, fan token ecosystems, and sports betting across the EU.
- Compared regulatory frameworks and digital-asset adoption across EU markets, connecting media economics, taxation, and consumer welfare.

Advised by Dr. Michael Jones, Department of Economics; supported by the Taft Research Center and Kautz-Uible Economics Institute.

Macroeconomic Determinants of Box Office Revenue: A Time Series Analysis

- Applied Dynamic Regression, VAR, and VECM models to test how interest rates and consumer spending relate to U.S. box office receipts.
- Evaluated long-term equilibrium relationships and forecasting performance using monthly economic and entertainment-sector data.

Advised by Dr. Olivier Parent, Department of Economics.

Determinants of Box Office Revenue: A Cross-Country Comparison of the US and South Korea, 2020–2025

- Applied regression analysis in R to identify what drives theatrical success in the U.S. and South Korea.
- Examined how production budgets, screen allocation, and genre effects differ across producer-driven and exhibitor-driven film industries.

Advised by Dr. Na Young Lee, Department of Economics.

Shaping Cinemanomics: The Rise of Saudi Arabia and the UAE in Global Film

- Mapped the rapid expansion of Saudi and Emirati capital and policy influence in European and British film.
- Built a network of industry contacts across the Saudi and Emirati film commissions, the Red Sea Foundation, the European Audiovisual Observatory, CNC (France), the Italian Film Commission, and the British Film Commission.

Advised by Dr. Thomas Moore, Department of Political Science; supported by the Taft Research Center.

Cryptocurrency Portfolio Management and Market Sentiment Analysis

- Modeled bitcoin portfolio strategies in Python, combining sentiment analysis, RSI indicators, and risk-adjusted performance metrics.
- Assessed Fear & Greed Index-based and market-cap-weighted allocation strategies across major digital assets, 2020–2025.

Advised by Dr. Tong Yu, Department of Finance.

SKILLS

Media Measurement & Analytics: Nielsen Media Impact, Nielsen ONE, Comscore CCR, Samba TRF, VideoAmp, TVision, iSpot

Data & Programming: R, Python, SQL

Business Intelligence & Finance Tools: Excel, Tableau, Power BI, Bloomberg Terminal, DRM

Languages: English (Native), Hindi (Native), French (Working Proficiency), German (Working Proficiency)

Work Authorization: STEM OPT eligible — up to 36 months of U.S. work authorization without employer sponsorship
